SRINIVASARAO ACHANTA

Founder & Managing Director

“ Growth, for us, has always been about building trust, delivering with responsibility, and creating infrastructure that serves long-term progress.

With Best Infra’s proven experience in EPC, energy systems, and reliable project execution, Best Charg is our focused step toward supporting India’s clean mobility transition.

As electric vehicle adoption grows, the need for safe, scalable, and dependable charging infrastructure becomes critical. Through Best Charg, we aim to deliver EV charging solutions with engineering clarity, transparent execution, and strong service support — helping businesses, communities, and cities move confidently toward cleaner mobility.

# Why Choose Best Charg

Best Charg delivers smart EV charging infrastructure, charging hubs, and CMS platform designed for reliable, scalable, and efficient EV operations.

## Reliable Charging Infrastructure

Delivering reliable, efficient EV charging systems built for seamless and dependable operations.

## End-to-End EV Ecosystem Support

Providing end-to-end EV charging solutions, from infrastructure deployment to network management and support.

## Intelligent Operator Platform

Enabling operators and EV users to monitor, manage, and access charging services through a smart mobile application.

## Scalable EV Network Solutions

Building scalable charging networks for public, commercial, and fleet EV operations.

# India's EV Growth Opportunity

India targets 30% EV penetration by 2030, driving the need for approximately 1.32 million public EV chargers nationwide.

भारी उद्योग मंत्रालय  
MINISTRY OF  
HEAVY INDUSTRIES

## PM E-DRIVE SCHEME

Supporting India's PM E-Drive vision for scalable EV  
Infrastructure and clean mobility growth.

### EV Opportunities

1

#### 45% EV CHARGING CAGR

India's EV market growth  
rate through 2030 (NITI  
Aayog)

2

#### 1:235 CHARGER-TO-EV RATIO

Government target for  
new vehicle sales by  
2030

3

#### 10L Cr+ MARKET SIZE

Cumulative EV  
ecosystem opportunity  
by 2030

4

#### 50M+ EV's ON ROAD

Projected EVs in India  
needing daily charging

5

#### 5X CHARGING NETWORK GROWTH

India's public EV  
charging network has  
grown nearly fivefold  
since FY22

6

#### 375K+ EV CHARGERS

India may require around  
375,000 public charging  
points by 2030

# Our Solutions

End-to-end EV Charging solutions to power every need across infrastructure, operations, and management.

## Our Expertise

### EV INFRASTRUCTURE

Complete design, installation, and commissioning of EV charging infrastructure for commercial and public applications.

### CHARGING STATIONS

Smart charging stations with seamless user experience and intelligent energy management.

### FLEET CHARGING

Dedicated charging hubs for logistics fleets, commercial vehicles, and public transport operations.

### FAST CHARGERS

DC fast chargers from 60 kW to 240 kW supporting CCS2 and Bharat DC standards for rapid EV charging.

# Our Solutions

End-to-end EV Charging solutions to power every need across infrastructure, operations, and management.

## Our Expertise

### SMART CHARGING

Delivering intelligent EV charging solutions with optimized power management, seamless connectivity, and efficient charging operations.

### CHARGING STATIONS O&M

Providing reliable operation and maintenance services to ensure maximum charger uptime and operational efficiency.

### NETWORK INTEGRATION

Enabling seamless integration of chargers, energy systems, payment platforms, and digital infrastructure into a unified EV ecosystem.

### CHARGING MANAGEMENT SYSTEM

Centralized CMS platform for real-time monitoring, remote access, analytics, billing, and EV network management.

Deployment of AC charging solutions for reliable, efficient, and scalable EV operations.

## AC Charger - Electric Vehicle Supply Equipment

### Aries Series

Ideal for residential, workplace, and commercial locations requiring convenient daily EV charging.

**Aries 3kW**  
(8-10 hrs)

Compact entry-level AC charger designed for slow residential EV charging using standard home power supply.

**Aries 7kW**  
(4-8 hrs)

Compact smart AC charger ideal for residential EV charging with RFID access and app connectivity.

**Aries 11kW**  
(3-5 hrs)

Reliable AC charging solution designed for workplaces and commercial parking areas.

**Aries 22kW**  
(1-3 hrs)

High-performance AC charger built for public and semi-commercial charging applications.

### Use Cases

Gated Communities

Housing

Hotels & Restaurants

**Disclaimer:** Charging time may vary based on vehicle battery and charger capacity.

Deployment of DC fast-charging solutions for reliable, efficient, and scalable EV operations.

## DC Charger - Electric Vehicle Supply Equipment

### Polaris Series

Designed for highways, fleets, and public stations requiring fast and high-capacity EV charging.

**Polaris 30kW**  
(1.5 – 2 hrs)

Smart DC fast charger with efficient and seamless charging.

**Polaris 60kW**  
(45 – 60 min)

Compact high-speed DC charger for modern EV infrastructure.

**Polaris 90kW**  
(25 – 40 min)

Powerful DC charger with smart load balancing and monitoring.

### Use Cases

Airports

Work Place

Hotels & Restaurants

**Disclaimer:** Charging time may vary based on vehicle battery and charger capacity.

Deployment of DC fast-charging solutions for reliable, efficient, and scalable EV operations.

DC Charger - Electric Vehicle Supply Equipment

## Polaris Series

Designed for highways, fleets, and public stations requiring fast and high-capacity EV charging.

Polaris 120kW  
(20 – 30 mins)

High-capacity EV charger with intelligent charging management.

Polaris 180kW  
(12 – 20 mins)

Ultra-fast DC charger with smart energy optimization features.

## Use Cases

Highway Corridors

Airports

Public Parking

**Disclaimer:** Charging time may vary based on vehicle battery and charger capacity.

# Charging Management System

Manage EV charging operations seamlessly through the Best Charge CMS platform with real-time monitoring, analytics, user management, and remote control capabilities.

## Core Features

### ▪ Digital Interfaces:

- 3 touchpoints for accessing platform based on user type
- EV user mobile app, operator app for charging stations, and enterprise web portal for charging business
- Secure login and signup

### ▪ User Management:

- Authorization & Authentication. OTP and QR code
- Multi-Role access (Admin, Finance, Infra, Account host)
- Customer Management Features – view details, configure roles

### ▪ Asset Management:

- Onboarding of assets (Support for OCPP and MCQT protocols)
- End-to-End management of assets including live status, pricing configuration, hierarchical classification, detail classification

### ▪ Payments:

- Wallet based payments via payment gateway
- Automatic invoice generation with every transaction
- Tariff management at station, charger & connector level

Mobile Apps (Android/iOS)

We commercialize EV drivers' time by transforming charging dwell time into valuable retail, F&B, and commercial opportunities.

The EV Opportunity

EV Charging Dwell Time

30 MIN – 2 HOURS

The Average window of high-intent engagement.

DRIVE MORE VALUE

SHOP

DINE

RELAX

INTEGRATED ECO SYSTEM

SMART EV CHARGING

Reliable, fast and intelligent charging.

SMART PARKING

Easy access and optimized experience.

RETAIL SPACES

Shops and lifestyle stores to engage visitors.

F&B CAFÉ'S

Great food and beverage options.

DIGITAL EXPERIENCE

App-based access and real-time updates.

BUSINESS INSIGHT

Analytics and revenue tracking.

# Residential & Community EV Charging Solutions

- Communities
- Apartments
- Gated Homes
- Villas & Townships
- Resident Parking
- Shared Charging

Welfare societies can seamlessly monitor individual EV charging consumption with transparent energy visibility and smart wallet-based billing.

Enabling efficient resident-wise tracking and smarter community energy management.

## Smart Residential EV Charging

### RESIDENT ACCESS

Resident-only secure access.

### SMART BILLING

Energy tracking with smart billing.

### RESIDENT APP INTEGRATION

App-based access, monitoring, and charging control

### REMOTE MONITORING

Live charger status and usage insights.

### 24/7 AVAILABILITY

24/7 reliable charging access.

Building EV-ready Communities  
With Intelligent and reliable  
**Charging Infrastructure.**

# Commercial & Enterprise EV Charging Solutions

Commercial spaces can manage EV charging efficiently with smart monitoring, energy distribution, and integrated payments.

Designed to support workplaces, malls, corporate parks, fleets, hotels, and public parking infrastructure with scalable and reliable charging management.

## Smart Commercial EV Charging

### FLEET & EMPLOYEE ACCESS

Secure charging for employees and fleets.

### SMART ENERGY MANAGEMENT

Efficient power balancing across chargers.

### CENTRALIZED CMS INTEGRATION

Unified monitoring and charger management.

### REMOTE MONITORING & ANALYTICS

Track performance and energy usage remotely.

### 24/7 RELIABLE OPERATIONS

Reliable charging for continuous usage.

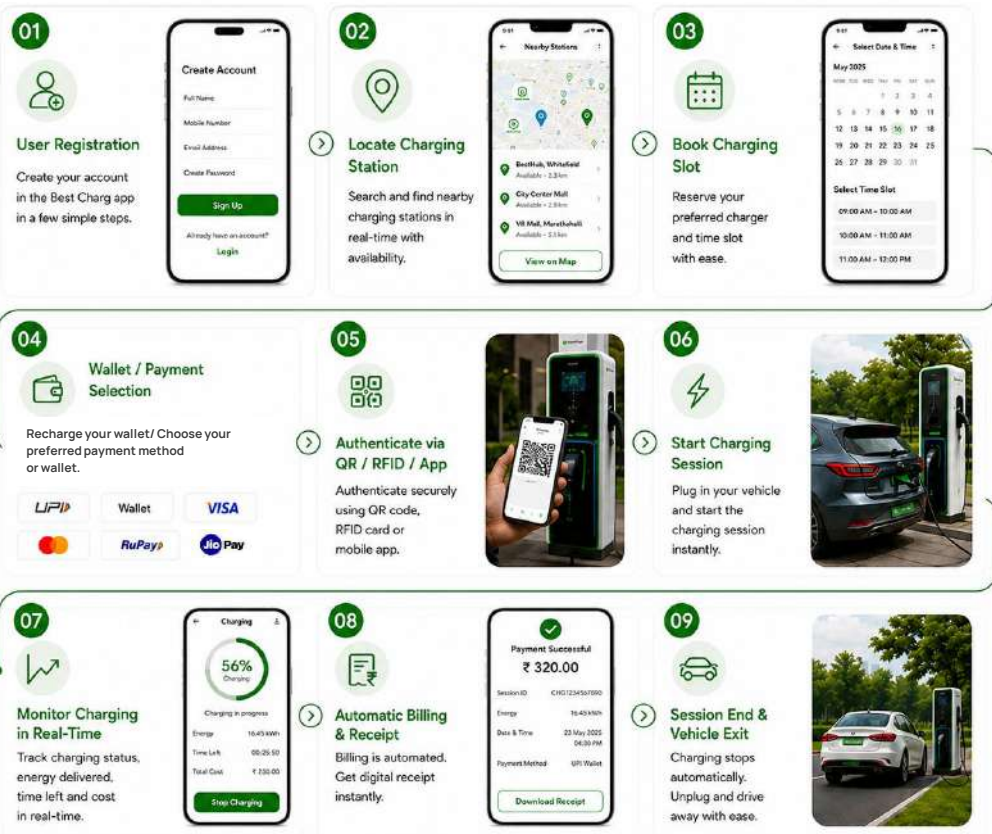

Building Smart Commercial Spaces  
With Scalable and Intelligent  
**EV Charging Infrastructure.**

# EV Charging Session Flow

A seamless and smart charging experience from search to drive

## Secure & Reliable

Safe authentication and secured transactions.

## Smart & Efficient

Real-time monitoring and intelligent charging.

## Transparent & Fair

Clear pricing and automated billing.

## 24/7 Charging Support

24/7 assistance for a smooth charging experience.
