

Smart Solar. Transparent Delivery.

From design to performance —
your plant is built with precision
and backed by care.

OVERVIEW

Smart solar solutions
with reliable, efficient,
and sustainable
energy delivery.

Powering a Sustainable Tomorrow.

-  Solar EPC
-  Clean Energy
-  Reliable Support

SRINIVASARAO ACHANTA

Founder & Managing Director

“

Growth, for us, has always been about building trust, delivering with responsibility, and creating infrastructure that serves long-term progress. With Best Infra’s proven experience in EPC, energy systems, and reliable project execution, **Best Infra is our step toward building smarter and sustainable infrastructure across India.**

As clean energy adoption accelerates, the demand for reliable and scalable solar infrastructure continues to grow. Through BestInfra’s expertise in EPC, O&M, and smart energy solutions, we are committed to delivering efficient solar projects with quality execution, operational excellence, and long-term sustainability – empowering industries, businesses, and communities toward a greener future.

Complete Solar Partnership.

End-to-end solar support built for efficiency, reliability, and long-term value.

KEY DIFFERENTIATORS

- 1

Proactive Support Model
AMC, predictive maintenance, and real-time issue resolution – standard, not optional.
- 2

Bankable Performance Guarantee
Generation assured. Backed by data. Audited by third parties.
- 3

Top-Tier Components Only
N-TOPC on modules, IP65 inverters, SCADA, and fire-rated cabling.
- 4

Real-Time Monitoring & Alerts
Track performance, uptime, and fault status via cloud dashboards.
- 5

Regulatory-Ready Execution
DISCOM liaising, CEIG approvals, and net metering – fully managed.
- 6

Post-Sales Support That Stays
SLA-driven response time and preventive maintenance as standard.

Built for Execution.
Backed by Data.
Committed to You.

Let Best Infra be your partner in precision, savings, and sustainable progress.

Recognized for Quality. Certified for Trust.

Reliable Solar Solutions for Every Scale

Delivering efficient, scalable, and future-ready solar infrastructure.

Our Solar Expertise

Site Feasibility & ROI Assessment

We start with a detailed energy audit, roof assessment, and load profile analysis — followed by a savings model tailored to your tariff and usage pattern.

Design & EPC Execution

Custom layouts, string planning, and BOM — delivered with Tier-1 components, IS-compliant safety, and predictive performance modeling.

Power Evacuation & Regulatory Approvals

We manage CEIG inspections, DISCOM liaising, and Net Metering — ensuring hassle-free energy injection and full regulatory compliance.

Performance Optimization & Energy Audits

Providing energy audits, performance analysis, loss identification, and system optimization to maximize solar plant efficiency and power output.

Reliable Solar Solutions for Every Scale

Delivering efficient, scalable, and future-ready solar infrastructure.

Our Solar Expertise

SCADA, IoT & Remote Monitoring

Real-time energy generation tracking, AI - based fault detection, and cloud-accessible dashboards — all built for transparency and uptime assurance.

AMC + Predictive O&M

AMC plans with SLA - backed maintenance, remote diagnostics, and on - ground response teams — designed for long - term reliability and savings retention.

Hybrid Integration

Combine solar with battery storage or diesel generators — designed for blackout - prone areas or mission - critical operations.

Energizing Land and Industry with Megawatt Solar.

Solar Inc provides turnkey megawatt-scale solutions for **PM-KUSUM** agricultural projects, utility-scale solar parks, and seamless industrial integration to deliver long-term energy security and operational savings.

IFF-Danisco – Turkapally, Telangana

CASE STUDY

DETAILS

CAPACITY

- 253 kWp Rooftop Solar Plant

MODEL

- Opex / RESCO – 20-Year Power Purchase Agreement

ESTIMATED GENERATION

3,65,060 kWh/year

TELANGANA LOCATION

(17.63° N, 78.53° E)

DESCRIPTION

Fox Life Sciences partnered with Best Infra to reduce its dependency on grid power, control long-term energy costs, and meet internal ESG goals.

The project involved a rooftop solar plant deployed under an Opex model with zero upfront investment. Best Infra managed the end-to-end EPC, CEIG approvals, and net metering process, while ensuring top-tier component usage and future-ready SCADA integration.

A high-efficiency system with predictable generation, no compliance gaps, and projected savings of ₹2.4Cr over 20 years.

KEY HIGHLIGHTS

Zero Capex Model

20-year RESCO with no upfront investment

End-to-End EPC + Approvals

Executed and managed by Best Infra

N-TOPC on Modules

High-efficiency panels with >22.6% output

SCADA-Based Monitoring

Real-time performance + predictive alerts

₹2.4 Cr Projected Savings

Over 20 years of guaranteed generation

How It Works

Deployment Options

Capex Model (Ownership) →

- **You invest. You own.**
- Full asset ownership from **Day 1**
- **3–5 years** payback, **25+ years** performance

Benefits: Accelerated depreciation, direct savings, ESG asset creation.

Opex Model / RESCO (Pay-per-Use) →

- **Zero upfront investment**
- Best Infra facilitates a **Power Purchase Agreement (PPA)**
- Pay only for electricity consumed (per unit)

Benefits: Immediate savings, no capex burden, performance risk lies with us.

Hybrid Model (Shared Investment) →

- **Flexibility meets performance**
- Shared investment or deferred ownership based on **mutual terms**
- Useful for multi-site, staggered deployment or investor-tied projects

Benefits: Optimized cash flow + asset control over time

Financial Impact & ROI Summary

Maximize returns with a solar investment model built for long-term value and minimal risk.

Model	Tariff (₹/kWh)	Tenure	Projected Savings
Option 1	₹6.25	10 Years	₹62.7 Lakhs
Option 2	₹5.75	15 Years	₹1.30 Cr
Option 3	₹5.00	20 Years	₹2.40 Cr
Option 4	₹5.75	25 Years	₹3.40 Cr

WHY IT MATTERS

- Guaranteed energy cost savings year after year
- No asset depreciation or maintenance burden
- Clean energy adoption without Capex pressure
- Ideal for ESG, RE100, and sustainability goals

RESULTS

Locked-in Tariff

Hedge against rising grid electricity costs for the next 20 years.

Zero Capex Investment

Complete cost savings with no financial burden on internal cash flows.

Accelerated Payback on ESG Goals

Boost your sustainability metrics without capital allocation.

Performance-Linked Payments

Pay only for units consumed – backed by a generation guarantee.

Transparent Return Metrics

All savings verified through metered SCADA data.

Clientele

Affiliation & Collaboration
